

ONIT Logistics Fuel Surcharge Mechanism 2024

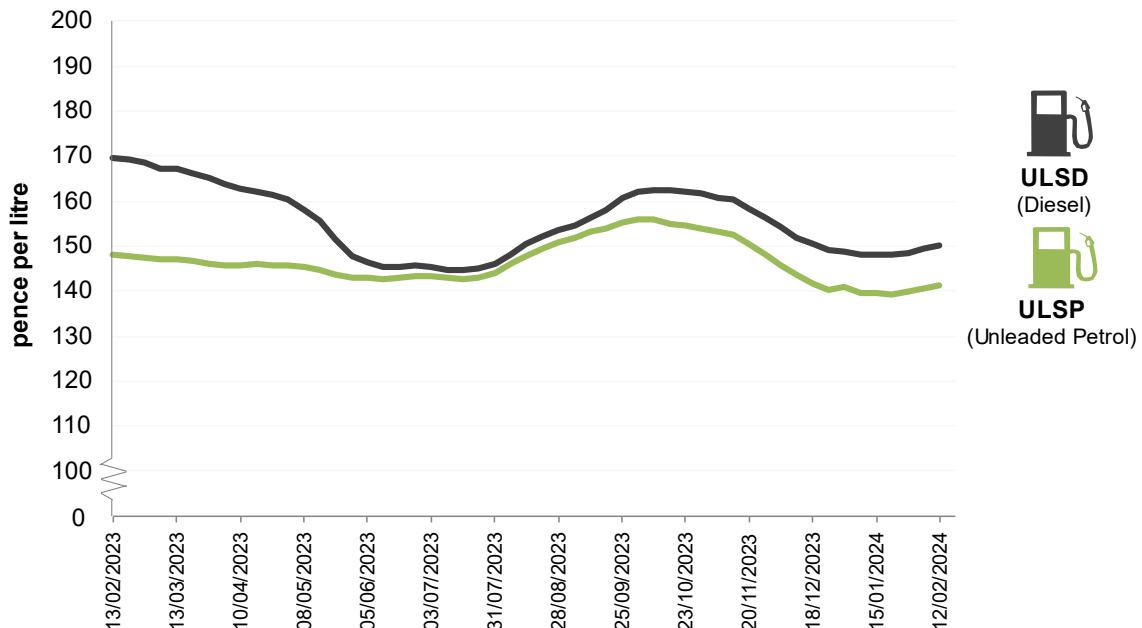

The Standard Fuel Surcharge applies to all transportation services provided by Onit Logistics Group Ltd. It is based on the UK Average Diesel PPL as quoted by the Business, Energy & Industrial Strategy department as part of their weekly fuel price report.

<https://www.gov.uk/government/statistics/weekly-road-fuel-prices>

Diesel PPL		Time Critical	Logistics
From	To	Variable Fuel surcharge	Per Route
135	144.9	2%	£5.75
145	149.9	3%	£8.63
150	154.9	4%	£11.50
155	159.9	6%	£14.38
160	164.9	8%	£17.25
165	169.9	10%	£20.13
170	174.9	12%	£23.00
175	179.9	14%	£25.88
180	184.9	16%	£28.75
185	189.9	18%	£31.63
190	194.9	20%	£34.50
195	199.9	22%	£37.38
200	204.9	25%	£39.99

The table below shows the UK Average Diesel weekly price bands, which correspond to our fuel supplements. Please be aware that there may be a 1-week lag in the application of the index. This is due to the release dates of the fuel price data by the Business, Energy & Industrial Strategy Report.

Weekly road fuel prices over the 12 months to 12 February 2024

Your Questions Answered

Q. Why are Onit Logistics Ltd applying a fuel surcharge?

A. For some time now, we have been absorbing the increased cost of fuel and higher cost of living, however, due to continuing fluctuations in fuel prices, we are implementing a fuel surcharge to ensure that we maintain service quality and correctly remunerate our couriers during this unprecedented cost of living increase. Our aim is to keep the surcharges fair and transparent. Put simply, fuel surcharges will rise & fall, subject to a minimum charge of 2%/£5.75, in line with the weekly movement of pump fuel prices.

Q. How will I be informed about adjustments to the fuel surcharges?

A. The fuel surcharges will be reviewed weekly in line with the change in diesel prices, this will be updated and viewable on our website. We recommend that you regularly check our website for any updates.

Q. Why is there a different mechanism for Time Critical Services and Logistics services

A. To maintain a balanced approach that correctly and fairly reflects the increase in costs on specific service types we have taken the approach to implement a variable approach to Time Critical same day customers and a fixed price increase on Logistics Service runs.
